ABBA Carcase Competition

The Australian Brahman Breeders' Association would like to acknowledge the Central Queensland Carcase Classic for the use of their scoring program which was used to determine the results of this competition. The scoring system uses a balance of meat quality and production measurements that encourages the creation of a functional breeding herd with profitable and high value progeny.

Weight Gain

Weight gain is formulated with an entry weight taken at 15 days on feed and an exit weight calculated using finished carcase weight and a yield assumption of 54%

Reasons for Carcase Scoring Measurements

The scoring system has endeavoured to find a correct balance between quality, yield and weight gain with the splits being approximately Quality 37%, Yield 37% and Weight Gain 26%.

TEETH /DENTITION

- Moderately accurate description of progressive age for an animal
- Eliminates aged animals
- Indicates weight for age which directly relates to animal's profit-making potential

HOT STANDARD CARCASE WEIGHT

- Indicates suitability for market specifications
- With dentition indicates weight for age which is a high value production measurement

P8 FAT/ RIB FAT

- Excessive fat leads to poor carcase yield
- Not enough fat affects chill and meat quality of carcase

EYE MUSCLE AREA

- Indicator of carcase yield

ESTIMATED LEAN MEAT YIELD

- More lean meat harvested off carcase means greater returns for processors
- Can be contradictory to Meat Quality so a balance of measures must be used

FAT COLOUR

- While not affecting meat quality whiter coloured fat is most preferred by consumers

MEAT COLOUR

- Meat colour reflects directly on pH levels of meat
- Dark colour and high pH while not always affecting tenderness does always affect shelf life and consumer acceptance

MARBLING

- Large effect on meat quality

MSA

- Uses a lot of the above measures to come up with an accurate Meat Quality index

ABBA Feedlot Trial & Carcase Champion Results

INDIVIDUAL CARCASE

 Champion Individual Carcase	Fern Hills Grazing	133.26	F521260
 Reserve Champion Individual Carcase	Hartley Grazing	131.67	F031013

Scoring System

The ABBA Feedlot Trial Scoring System is based on the Scoring System for the Central Queensland Carcase Classic. Some allowances have been made for Brahman cattle.

HEADING	DESCRIPTION	NOTES
Dent	Dentition	Number of permanent incisor teeth
HSCW	Hot Standard Carcase Weight	Kilograms
WFA Points	Weight for Age Points	As per Table (Max - 20 points)
P8 Fat Depth	Fat depth at P8 (rump) site	Rump fat in mm
P8 Fat Points	Points for P8 fat measurement	As per Table (Max - 15 points)
Rib Fat Depth	Subcutaneous fat depth at 10/11th rib	Rib fat in mm
Rib Fat Points	Points for rib fat measurement	As per Table (Max - 15 points)
EMA	Eye Muscle Area	Area of eye muscle (cm ²)
EMA Points	Points for EMA	$\frac{\text{EMA} + 13\%^*}{2} - \frac{\text{HSCW}}{11}$ (Max - 35 points) (* - adjustment for 10/11th rib)
ELMY Points	Estimated Lean Meat Yield (composition of red meat in carcase)	$[8.68 + (0.54 \times \text{HSCW}) - (1.338 \times \text{Rib Fat Depth}) + (0.259 \times \text{EMA})]$ as % of HSCW, divided by 2 (Max - 35 points)
Fat Colour	Colour of Fat at 10/11th rib	AUS-MEAT Fat Colour Chips (0 - 8)
Fat Colour Points	Points for Fat Colour	As per Table (Max -10 points)
Meat Colour	Colour of Meat at Cube Roll	AUS-MEAT Meat Colour Chips (1A- 6)
Meat Colour Points	Points for Meat Colour	As per Table (Max 10 points)
Marbling	Amount of intra-muscular fat in Cube Roll	AUS-MEAT Marbling Cards (0 - 9)
Marbling Points	Points for Marbling	AUS-MEAT Measurement x 2 (Max 10 points)
MSA Index	Meat Standards Australia Index	Measurement of Eating Quality
MSA Points	Points for MSA Index	As per Table (Max 20 points)

Scoring System (CONTINUED)

HEADING	DESCRIPTION	NOTES
Total Points	Total points for carcase	Max - 205 points
Pen Total	Total points for 3 carcasses	Total Points for Pen
Weight Penalty Points	Tolerance of 5 kg within each specified class weight range, above or below. 1 point deducted for each part of 1 kg out of range.	Tolerance of 5 kg only allowed, before weight disqualification. (Max -5 points)
Hook Points (Class 9)	Points awarded for Carcase Placings. 20 points down to 2 for 1st to 10th.	Max 20 points. All entries receive 2 pts.
Aggregate Points (Class 9)	Total points for Hoof and Hook entries	Hoof Points plus Hook Points. Max 40 pts.
Weight Gain Points (Class 10)	Points for Live Weight Gain	Equal to the Total Weight Gain divided by 4. (Max – 75 pts).
NG	Not Graded	
Disqualification	D1: Weight D2: Fat D3 Teeth	D1: Above or below weight specs after allowable 5 kg tolerance. All carcasses above 420 kg will be disqualified. D2: Outside P8 fat specifications (5-22mm) D2: Rib Fat specification <3mm D3: Greater than specified number of teeth.
